

making a real difference

Variety Pack Change

We wanted to reach out to share some exciting news about our product offerings. After much research and consideration, we have made the decision to say goodbye to our mixed meats and casserole variety packs and move to something even better!

We are moving our top selling products to a new and improved smaller pack sizes, down from 36 to 24 units in each pack of our individual products. This change will allow you to have better inventory control and help free up space in your freezer.

What this means for you:

More variety - With smaller pack sizes, you have the freedom to mix and match products and try new items without committing to a large quantity. This provides you with greater flexibility and more options to choose from.

Standardized sizes - Our new pack size is consistent with our other texture modified products, bringing you the same convenience and familiarity you've come to expect.

Storage space - Smaller cases mean you will have more room in your freezer to store a wider variety of food and reduce food spoilage. This not only benefits you but also reduces waste and helps the environment.

Variety Pack Changes
